

# ORBISMED

## FREQUENTLY ASKED QUESTIONS

### **1. When and how will I be informed about my next transfer to the clinic?**

We inform our patients via WhatsApp, typically messaging them in the evening. While we aim to send transfer details as early as possible, it may take until 11 PM for us to confirm your transfer time.

### **2. How much time will my procedure take?**

The duration of your procedure varies depending on the treatment. Once your appointment is confirmed, we'll provide an estimated timeframe if possible.

### **3. What should you bring with you to the clinic?**

We recommend bringing your passport on your first visit. It's also helpful to have a digital copy of your passport and know your passport number before your flight.

### **4. Can you use our transfers for different locations while you are here?**

Our transfers are designed to take you between your hotel and the clinic. After your procedure, you can request to be dropped off at a different location. For any additional transfer needs, please contact us. These services may incur extra charges.

### **5. What should you eat/drink before coming to the clinic?**

For procedures involving sedation, refrain from eating or drinking for at least 6 hours before your appointment. For all other visits, we recommend having a good breakfast, particularly on your first day.

### **6. Will I be sedated?**

Sedation is not standard unless specifically requested. If you would like sedation, please inform us in advance. This service incurs additional costs and requires you to fast for 6 hours beforehand. Rest assured, even without sedation, our procedures are pain-free.

### **7. What about my medical history?**

We will discuss any specific health issues with you before your arrival. At the clinic, you'll complete a medical history and allergies form. Your health status will always be carefully considered before starting any treatment.

## **8. How will I know when and where my airport transfer will pick me up?**

This information is included in the voucher document sent via email. Typically, airport transfers pick you up 3–3.5 hours before your flight. Upon arrival, our transfer driver will be waiting for you.

Tip for departure day: We recommend checking in for your flight online to save time at the airport.

## **9. What should I do if I encounter any issues with my hotel?**

For any hotel-related concerns, please consult us before speaking to the hotel staff. We're here to assist you.

## **10. What can I expect regarding temporary and permanent teeth?**

During your visit, we'll provide detailed aftercare guidelines based on your treatment type, whether you're receiving temporary or permanent restorations.

## **11. Why didn't I get any messages about my next appointment's transfer?**

In some cases, your next appointment might not be scheduled for the following day, but rather with a one-day gap. If you haven't received a message by the morning of the day in question and are unsure whether you're scheduled to visit the clinic, feel free to contact us for clarification.

## **12. How long does the trip from the hotel to the clinic take?**

The hotels we work with are generally within a 15-minute drive to the clinic. If there's any variation in this distance, we will inform you, and your transfers will be arranged accordingly.

## **13. How will I get my prescription?**

If you're prescribed medication, we'll ask the transfer driver to stop by a pharmacy to collect it. You'll receive a prescription guideline for your reference, which you should keep, while the actual prescription will need to be handed to the pharmacist. If you have any questions or issues, don't hesitate to reach out to us.

## **14. Who Should I contact?**

For questions regarding sales, please contact our **general management and sales dpt: +90 543 817 36 77** For questions and issues regarding the hotel, your treatment and anything else about your journey please contact our **Patient Care Director: +90 542 124 36 99**
