

PATIENT ACKNOWLEDGEMENT & INFORMED CONSENT

Compromised Maxillary Implant Case – Conventional Complete Denture

Patient Name: **Nicola Louise Millar**

Passport / ID No: **155048076**

Date: **09.01.2026**

Clinic: OrbisMed / OrvionMed Clinics

1. Current Clinical Situation

I hereby confirm that I have been fully informed that:

I have previously placed implants in my upper jaw (maxilla) of unknown brand, unknown surgical protocol, unknown angulation and unknown biomechanical stability.

My current maxillary bone condition is severely resorbed and compromised.

Due to this condition, implant-supported hybrid prosthesis is NOT biomechanically possible or safe.

My existing implants are not suitable to carry any fixed or hybrid prosthetic restoration.

2. Recommended Treatment

I have been professionally advised that the ONLY biomechanically safe and medically recommended solution for my upper jaw is:

Zygomatic implant-supported fixed rehabilitation (minimum 4 zygomatic implants).

This treatment was explained to me in detail including:

Long-term stability

Functionality

Chewing efficiency

Bone preservation

Longevity and warranty coverage

3. Patient Refusal of Recommended Treatment

I voluntarily DECLINED the recommended zygomatic implant treatment solely due to personal and financial reasons.

I fully understand that by refusing the recommended treatment:

My remaining upper jaw bone will continue to resorb.

Fixed solutions will remain impossible in the future.

Prosthetic options will become even more limited over time.

4. Patient-Requested Alternative (Compromised Solution)

At my own insistence, I requested a conventional removable complete upper denture despite being informed that:

This is a compromised, non-ideal and temporary solution.

My existing implants had to be biologically isolated (put to sleep / submerged) to allow denture fabrication.

This prosthesis does NOT restore natural chewing power.

The prosthesis may lose retention, stability and comfort over time.

This solution does NOT qualify for long-term warranty.

5. Limitation of Liability

I acknowledge and accept that:

The clinic cannot be held responsible for future:

Bone loss

Denture instability

Functional limitations

Need for re-treatment

Loss of existing implants

Any future fixed rehabilitation will require new surgical procedures and full re-evaluation.

6. Acknowledgement

I confirm that:

All treatment options were explained to me in understandable language.

I was given sufficient time to ask questions.

I am making this decision voluntarily.
