

TOTAL DENTURE – INFORMED CONSENT

I understand that a total denture is a removable prosthetic device that rests on soft tissue and bone and is not fixed to implants.

I acknowledge that a total denture does not provide the same stability, chewing efficiency, comfort, or function as natural teeth or implant-supported prostheses.

RETENTION & FUNCTION LIMITATIONS

I understand that especially in the lower jaw, total dentures may move, lift, dislodge, lose retention, and cause sore spots due to limited bone support.

I acknowledge that speaking difficulties (lisp), chewing limitations, food entrapment, and denture movement are expected and normal biological consequences.

BONE LOSS, FACIAL & LIP SUPPORT CHANGES

I understand that after complete tooth loss, continuous bone resorption naturally occurs and may result in: decreased denture stability, facial profile changes, loss of lip support, sunken facial appearance, need for relining or remake of the denture.

I acknowledge that these changes are biological and anatomical processes, not treatment errors.

ADAPTATION PERIOD

I understand that adaptation to total dentures may take weeks or months and may never fully replicate the feeling of natural teeth.

ABSOLUTELY NO WARRANTY POLICY

I clearly understand and accept that total dentures carry absolutely NO WARRANTY.

I acknowledge that looseness, sore spots, speech difficulties, breakage, wear, color change, dissatisfaction, or biological changes do not constitute clinical error, malpractice, or improper treatment.

DAMAGE, MISUSE & EXTERNAL FACTORS

I understand that damage caused by dropping the denture, exposure to hot water, improper cleaning, bruxism, smoking, alcohol or substance use, misuse, or trauma is entirely my responsibility.

PATIENT RESPONSIBILITY

I understand that maintaining hygiene, careful handling, follow-up visits, and adaptation efforts are my responsibility.

FINAL ACKNOWLEDGEMENT

I confirm that I have read, understood, and accept all the conditions stated above.

Patient Name: _____

Signature: _____

Date: _____
