

POST-OPERATIVE & USAGE INSTRUCTIONS – TOTAL DENTURE

I understand that increased salivation, sore spots, pressure points, difficulty speaking, and chewing limitations are normal during the initial adaptation period.

I acknowledge that adaptation may take several weeks and sometimes months.

WEARING & REMOVAL

I understand that my denture must be removed daily to allow tissue rest.

I acknowledge that wearing the denture continuously may cause inflammation, fungal infections, and accelerated bone loss.

DENTURE ADHESIVES

I understand that denture adhesives may be used to improve retention but do not replace proper denture fit.

CLEANING & STORAGE

I understand that dentures must be cleaned daily using denture cleaning products. I acknowledge that hot water is strictly prohibited as it may permanently deform the denture. I understand that the denture must be stored in water or cleaning solution when not worn.

BREAKAGE & MISUSE

I acknowledge that dropping the denture, biting hard foods, opening packages, bruxism, smoking, alcohol, or substance use may cause fracture, deformation, and discoloration.

I understand that any breakage, deformation, or misuse is not covered under any warranty.

FOLLOW-UP & RELINING

I understand that bone resorption continues over time and may require relining, rebasing, or remaking of the denture, which are subject to additional fees.

FINAL ACKNOWLEDGEMENT

I confirm that I have read, understood, and accept all the instructions above.
