

TREATMENT PLAN – OPTION 3

Patient Name: Mr Bell

Practice: Euro Dental Care

368 Court Oak Rd, Harborne
Birmingham
B32 2DY
Tel: 0121 428 2999

Implant-Supported Posterior Rehabilitation with Anterior Composite Enhancement

Upper Arch

Phase 1 – Extractions

- Removal of upper left 6
- Removal of upper right 5

Phase 2 – Implant Placement

- 2 implants in the upper left posterior region
- 2 implants in the upper right posterior region

Phase 3 – Implant Restorations

- Two 3-unit implant-supported bridges (upper left and upper right)

Phase 4 – Endodontic Treatment

- Root canal treatment on upper right 2 and upper right 3

Phase 5 – Aesthetic Enhancement

- Composite bonding to upper anterior tooth
-

Lower Arch

Phase 1 – Extractions

- Removal of loose lower molar teeth

Phase 2 – Implant Placement

- 2 implants in the lower left posterior region
- 2 implants in the lower right posterior region

Phase 3 – Implant Restorations

- Two 3-unit implant-supported bridges (lower left and lower right posterior segments)

Phase 4 – Aesthetic Enhancement

- Composite bonding for lower anterior teeth

Phase 5 – Protection

- Custom-made gum shield/night guard for lower teeth and restorations
-

Clinical Recommendation

After thorough assessment, **this treatment option is not recommended as the preferred long-term solution.**

Due to the patient's existing bite pattern and occlusal forces, this approach carries a higher risk of:

- Composite chipping or fracture
- Increased maintenance requirements

- Reduced longevity and predictability of anterior restorations

While this option preserves more natural anterior tooth structure and is minimally invasive in certain areas, the biomechanical risks make it less stable and less durable compared to Options 1 or 2.

For optimal long-term function and durability, Option 1 or Option 2 is clinically preferred.

Benefits (if selected)

- Preserves more natural anterior tooth structure
 - Restores posterior support with implant bridges
 - Provides improved aesthetics for anterior teeth (with composite bonding)
-

Informed Consent

I confirm that the proposed treatment plan has been fully explained to me by the clinical team at Euro Dental Care.

I understand:

- The nature and purpose of the recommended treatment
- The expected benefits and outcomes
- The potential risks and complications, including but not limited to infection, implant failure, nerve disturbance, restoration fracture, chipping, and the possible need for future maintenance or replacement
- That no dental treatment can be guaranteed for lifetime longevity
- The alternative treatment options available to me, including the option of no treatment
- The estimated costs and staged payment structure (if applicable)

I have had the opportunity to ask questions, and all of my questions have been answered to my satisfaction.

I understand that treatment plans may need to be modified if additional findings arise during the course of treatment.

By signing below, I confirm that I give my informed consent to proceed with the selected treatment option.
