

FIBER POST & CORE BUILD-UP

INFORMED CONSENT FORM

Patient Full Name: _____ **Date:** _____

I understand that fiber post and core build-up is performed to reinforce a tooth that has undergone root canal treatment and has lost significant tooth structure.

I understand that the placement of a fiber post requires preparation of the root canal space and may weaken the remaining tooth structure.

I acknowledge that fiber post and core build-up does not guarantee long-term tooth survival and that the tooth may fracture, loosen, or fail despite proper treatment.

I understand that complications may include post debonding, post fracture, root fracture, pain, sensitivity, or reinfection.

I understand that a tooth restored with a fiber post and core typically requires a crown for long-term protection and function.

I acknowledge that failure to place a crown, excessive bite forces, bruxism, trauma, or poor oral hygiene significantly increase the risk of failure.

I acknowledge that additional treatment such as retreatment, crown replacement, or tooth extraction may be required and may involve additional fees not included in the initial treatment plan.

I acknowledge and accept that these outcomes are considered clinical risks and complications, not clinical errors, negligence, or improper treatment.

CONSENT CONFIRMATION

I confirm that I have read and understood this document in full, had the opportunity to ask questions, and voluntarily consent to fiber post and core build-up treatment under the conditions stated above at OrbisMed Clinics. I confirm that a copy of this informed consent has been provided to me.
