

POST-OPERATIVE INSTRUCTIONS

CROWNS & FIXED RESTORATIONS

Avoid eating or drinking until numbness has completely worn off.

Avoid very hard, sticky, or chewy foods for the first 48 hours.

Temporary sensitivity to hot, cold, or pressure is normal during the adaptation period.

Maintain excellent oral hygiene by brushing gently and flossing daily around crowns.

Do not use teeth to open packages or bite hard objects.

If discomfort persists, pain medication may be used as recommended.

Contact the clinic if severe pain, swelling, looseness, or fracture occurs.

Regular dental check-ups are essential for long-term success.

Failure to follow these instructions may compromise the longevity of crowns and may void any applicable treatment guarantees.

Patient Acknowledgement

I confirm that I have read and understood these post-operative instructions and agree to follow them.
