

ROOT CANAL TREATMENT

INFORMED CONSENT FORM

Patient Full Name: _____ **Date:** _____

I understand that root canal treatment is performed to remove infected or damaged pulp tissue from inside the tooth in order to relieve pain, control infection, and preserve the tooth.

I understand that the success of root canal treatment depends on multiple factors including the severity of infection, root anatomy, previous dental work, healing response, and oral hygiene.

I acknowledge that root canal treatment may not always be successful and that reinfection, persistent pain, swelling, abscess formation, or treatment failure may occur.

I understand that additional procedures such as retreatment, apical surgery, or tooth extraction may be required if root canal treatment fails.

I acknowledge that complications may include pain, swelling, infection, instrument fracture, perforation, missed canals, or delayed healing.

I understand that a tooth that has undergone root canal treatment may become more fragile and may require further restoration such as a crown to prevent fracture.

I acknowledge that any additional treatment required after root canal treatment may involve additional fees not included in the initial quotation or treatment plan.

I acknowledge and accept that these outcomes are considered clinical risks and complications, not clinical errors, negligence, or improper treatment.

CONSENT CONFIRMATION

I confirm that I have read and understood this document in full, had the opportunity to ask questions, and voluntarily consent to undergo root canal treatment under the conditions stated above at OrbisMed Clinics. I confirm that a copy of this informed consent has been provided to me.
