

TOOTH EXTRACTION – INFORMED CONSENT FORM

Patient Full Name: _____

Date: _____

INFORMATION & ACKNOWLEDGEMENT

I understand that tooth extraction is a surgical dental procedure performed when a tooth cannot be saved or must be removed for clinical reasons.

I understand that tooth extraction may be simple or surgical, and that unforeseen difficulties may arise during the procedure depending on tooth position, root anatomy, bone condition, or existing infection.

I acknowledge that possible risks and complications of tooth extraction may include pain, swelling, bleeding, infection, delayed healing, dry socket (alveolitis), bruising, limited mouth opening, and temporary or permanent numbness.

I understand that extraction of upper back teeth may involve a risk of sinus communication or sinus-related complications, which may require additional treatment.

I understand that during or after tooth extraction, fragments of tooth or root may remain, or surrounding bone or adjacent teeth may be affected despite appropriate care.

I understand that additional procedures such as surgical extraction, bone smoothing, suturing, medication, or referral for further treatment may become necessary.

I acknowledge that any additional treatments required during or after tooth extraction may involve additional fees which are not included in the initial treatment cost.

I acknowledge and accept that such outcomes are considered clinical risks and complications, not clinical errors, negligence, or improper treatment.

I understand that following tooth extraction, replacement options such as dental implants, bridges, or dentures may be recommended, and that choosing not to replace a missing tooth may result in functional or aesthetic changes.
