

ZYGOMATIC IMPLANT

INFORMED CONSENT FORM

Patient Full Name: _____ **Date:** _____

I understand that zygomatic implant treatment is an advanced and complex surgical procedure indicated in cases of severe maxillary bone loss where conventional implants are not feasible.

I acknowledge that zygomatic implants are long implants anchored in the zygomatic (cheek) bone and require specialized surgical training and experience.

I understand that this procedure carries higher surgical and anatomical risks compared to standard implant surgery.

POTENTIAL RISKS & COMPLICATIONS

I acknowledge that potential risks and complications may include, but are not limited to:

- Sinus-related complications, chronic sinusitis, sinus membrane perforation, or sinus infection
- Facial swelling, bruising, pain, bleeding, hematoma, or infection
- Nerve irritation or injury, including temporary or permanent numbness or altered sensation
- Facial pain, pressure, or discomfort in the cheekbone, eye, or sinus region
- Temporary or permanent changes in facial sensation
- **Visual disturbances, including double vision (diplopia), blurred vision, or eye discomfort**
- Orbital involvement or irritation of structures near the eye (rare but possible)
- Difficulty opening the mouth (trismus) or jaw discomfort
- Speech adaptation difficulties or prolonged adaptation period
- Implant failure, lack of osseointegration, or the need for implant removal
- Prosthetic complications requiring additional surgical or prosthetic intervention

I understand that healing and adaptation following zygomatic implant surgery may take longer than standard implant procedures.

I acknowledge that additional imaging, medications, hospital care, specialist consultations, or follow-up treatments may be required and may involve additional fees not included in the initial quotation.

I acknowledge that smoking, alcohol consumption, poor oral hygiene, uncontrolled systemic or medical conditions, certain medications, and failure to follow post-operative instructions significantly increase the risk of complications or treatment failure.

I acknowledge and accept that the above risks and outcomes are considered inherent clinical risks and complications of zygomatic implant surgery and do not constitute clinical error, negligence, or improper treatment.

I understand that no guarantees are provided regarding aesthetic outcomes, facial sensation, speech adaptation, sinus-related comfort, or long-term implant success, and that results may vary based on individual anatomy and biological response.

CONSENT CONFIRMATION

I confirm that I have read and understood this document in full, had the opportunity to ask questions, and voluntarily consent to undergo zygomatic implant treatment under the conditions stated above at OrbisMed Clinics. I confirm that a copy of this informed consent has been provided to me.
